

## The Ultimate Safety Scalpel Handle

# Reducing Sharps Injuries with Change-A-Blade™

## Designed for Safety and Compliance

- + Reduce incidence of sharps injuries
- + Comply with OSHA<sup>1</sup>, AORN<sup>2</sup> and The Joint Commission standards<sup>3</sup>
- + Increase employee safety, job satisfaction and retention
- + Limit your facility's liability and exposure

## Designed for Value and Performance

- + Features an audible-click protective safety shield, a textured gripping surface and a clear field of vision with uninterrupted puncturability
- + Meets “engineered controls” required by OSHA
- + Retains the surgeon's preferred scalpel handle feel—weight, balance, quality and performance, and works with their choice of stainless steel or carbon steel blades (sizes 10, 11 & 15—or equivalent)
- + Single-patient use
- + Comes with a removable TIME OUT Sleeve™

Make a positive change for improved safety and compliance.  
Protect your team with Change-A-Blade.™
