

Develop an environment that fosters staff retention.

"As of Fall 2007, 9 states (Hawaii, Texas, Washington, Rhode Island, Ohio, New York, New Jersey, Minnesota and Maryland) have "No-Lift" legislation and 7 others (Illinois, Massachusetts, California, Florida, Nevada, Michigan & New York) have followed by introducing or re-introducing "No-Lift" legislation. Over the last decade, nurses' association and occupational safety advocates succeeded in building powerful momentum for 'no-lift laws' to combat job-related injuries."

-www.nolift.com

"Each year over 10% of all nurses leave the profession, many citing back problems."

-www.centreforamericannurses.com

"Nursing is among the top ten occupations with the highest number of injuries. Workers compensation claims reveal the nursing profession ranks fifth in workforce-related back problems. Together with the nursing shortage and aging nurse force, this presents a hazardous situation for health care."

-Duke University Health System

Our products help you comply with OSHA requirements

Ergonomic Safety Products for the Healthcare Environment

Workplace Safety Products.

Reduce employee injuries from physical stress, strains, slips, trips and falls.

Patent Pending

Ergo-Step™ Stool Light weight (6 lbs.), easy to move. Cushioned surface, stackable, can be used for staff or patients. Weight capacity 500 lbs.

DriFloor™ Absorbent Floor Pad used in departments where fluids collect on the floor. Holds approximately 3 liters, weighs approximately 7 lbs. when fully saturated.

Ergo-Stand EZ™ Anti-Fatigue Mat reduces the stress and strain on joints when standing for long periods.

Trip-No-More™ Cord Alert covers cords and tubes on the floor. Bright orange serves as a safety beacon to prevent trips and falls.

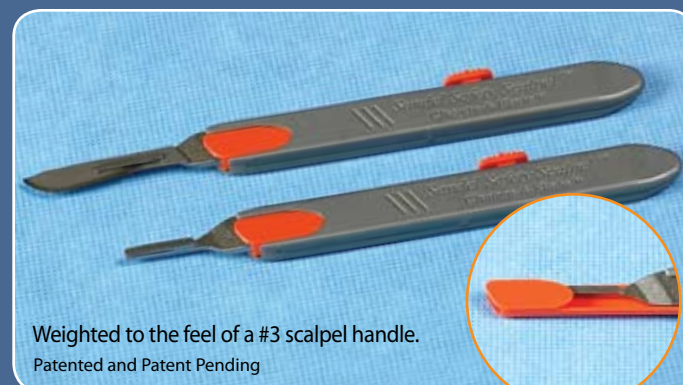

Decrease the risk of job-related musculoskeletal and sharps injuries.

Z-Slider™ Friction Reducing Ergo Device (F.R.E.D.) assists with patient transfer using “no-lift” sliding technique. Eliminate cross contamination. Patent # 6,675,411

Z-Slider™ Friction Reducing Ergo Device (F.R.E.D.) is used to boost patients. **Wall mount dispenser & holder** provide point of use convenience.

Weighted to the feel of a #3 scalpel handle. Patented and Patent Pending

Change-A-Blade™ Safety Scalpel Handle – allows the Physician to use their own #10, #11 or #15 blade. Retractable safety shield does not interrupt puncture-ability or field of vision.

Sandel Weighted Safety Scalpels Protect you and your co-workers from sharps injuries. All Safety Scalpels include a removable TIME OUT Sleeve.
