

The Simple Safe Patient Handling System

Z-Slider®—for Patient Repositioning and Transfer

Simply Safe

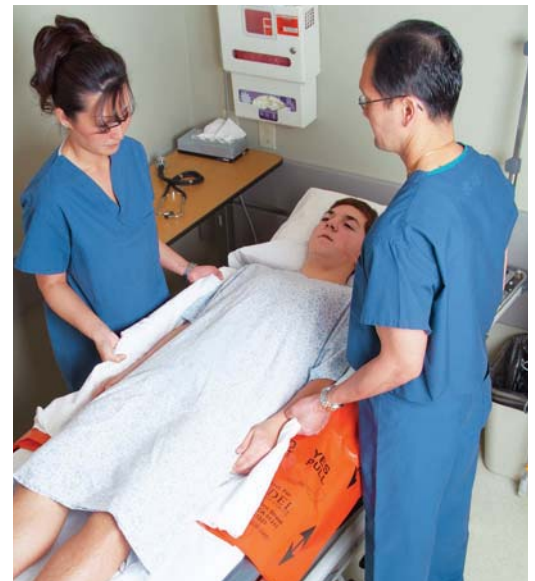

- + Z-Slider® helps prevent disabling back injuries that can result from lifting, transferring and repositioning patients
- + Decreases physical strain to back, shoulders, neck and arms
- + Supports proper patient handling and ergonomic techniques
- + Single-patient use—eliminates the potential for cross contamination

Simply Smart

- + Lowers costs associated with back injuries (workers' compensation, administrative and nurse staffing)
- + Complies with OSHA recommendations¹ and “No-Lift” Laws²

Simply Efficient

- + Facilitates streamlined care delivery with a convenient Z-Slider® dispenser at **point-of-use** in patient rooms, bedside tables or in the OR
- + Z-Slider® eliminates the time spent locating reusable patient handling devices

Z-Slider® is a convenient point-of-use device for both repositioning and transfer of patients.
