

## The Simple Safe Patient Handling System

# Z-Slider®—“No-Lift” Laws and Nurse Safety

## The Z-Slider® Solution

Many states are now passing “No-Lift” Laws to protect nurses from injuries resulting from unsafe patient handling and lifting.

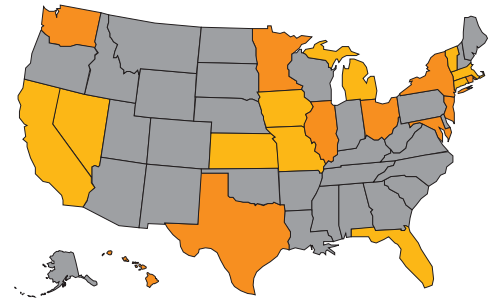

New laws require healthcare facilities to establish safe patient handling committees, programs, practices and zero-lift policies.

Consult with your state and local authorities for the latest legislative and funding updates.

## Improve Safety and Contain Costs

- Complies with OSHA recommendations<sup>1</sup> and “No-Lift” Laws<sup>2</sup>
- Helps reduce disabling back injuries by supporting proper transfer, repositioning and ergonomics
- Eliminates the possibility for cross contamination
- Convenient point-of-use dispenser improves efficiency of care delivery
- Lowers escalating workers’ compensation, administrative and nurse staffing costs

“No-Lift” Law States

- States known to have passed industry-specific legislation related to “No-Lift” Laws
- States known to have introduced or re-introduced legislation on “No-Lift” Laws

Steps are being taken to establish a national standard for safe patient handling, which is in congressional committee.
